TROPICAL CYCLONE BULLETIN NR. 3
Tropical Depression BASYANG

Issued at 11:00 AM, 04 February 2026
Valid for broadcast until the next bulletin at 5:00 PM today.

"BASYANG" MAINTAINS ITS STRENGTH AS IT MOVES SOUTHWESTWARD OVER THE EAST OF MINDANAO.

Location of Center (10:00 AM)

The center of Tropical Depression BASYANG was estimated based on all available data at **735 km East of Hinatuan, Surigao del Sur (8.7°N, 133.0°E).**

Intensity

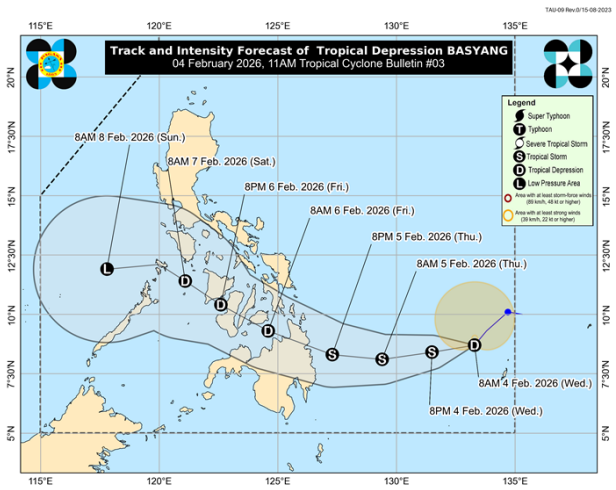
Maximum sustained winds of **55 km/h** near the center, gustiness of up to **70 km/h**, and central pressure of **1002 hPa**

Present Movement

Southwestward at 15 km/h

Extent of Tropical Cyclone Winds

Strong winds extend outwards up to **250 km** from the center



TRACK AND INTENSITY FORECAST

Date and Time	Center Position			Intensity		Movement dir. and speed (km/h)
	Lat. (°N)	Lon. (°E)	Location	MSW (km/h)	Cat.	
12-Hour Forecast 8:00 PM 04 February 2026	8.4	131.5	570 km East of Hinatuan, Surigao del Sur	65	TS	W 15
24-Hour Forecast 8:00 AM 05 February 2026	8.1	129.4	340 km East of Hinatuan, Surigao del Sur	65	TS	W 20

TROPICAL CYCLONE BULLETIN NR. 3
Tropical Depression BASYANG
Issued at 11:00 AM, 04 February 2026
Valid for broadcast until the next bulletin at 5:00 PM today.

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT			
TCWS No.	**Luzon**	**Visayas**	**Mindanao**
1 Wind threat: **Strong winds**	-	-	**Surigao del Sur and the eastern portion of Surigao del Norte** (Claver, Gigaquit, Bacuag) **including Siargao-Bucas Grande Islands**
	Warning lead time: **36 hours** Range of wind speeds: **39 to 61 km/h (Beaufort 6 to 7)** Potential impacts of winds: **Minimal to minor threat to life and property**		

OTHER HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

Refer to Weather Advisory No. 21 issued at 11:00 AM today for the heavy rainfall outlook due to Tropical Cyclone BASYANG.

Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- **Minimal to minor impacts** from strong winds are possible within any of the areas under Wind Signal No. 1.

The highest Wind Signal that may be hoisted throughout the passage of BASYANG is Wind Signal No. 2.

The surge of the Northeast Monsoon will also bring strong to gale-force gusts over the following areas (especially in coastal and upland areas exposed to winds):

- **Today:** Most of Luzon, Visayas, Dinagat Islands, Caraga, Davao Region, Zamboanga Peninsula, Camiguin, Misamis Oriental, and Lanao del Norte.
- **Tomorrow (05 February):** Most of Luzon, Visayas, Caraga, Davao Region, Northern Mindanao, Zamboanga Peninsula, Basilan, and Tawi-Tawi.
- **Friday (06 February):** Batanes, Babuyan Islands, northern portion of mainland Cagayan, Ilocos Norte, Central Luzon, Metro Manila, CALABARZON, MIMAROPA, Bicol Region, Visayas, and most of Mindanao.

TROPICAL CYCLONE BULLETIN NR. 3
Tropical Depression BASYANG

Issued at 11:00 AM, 04 February 2026
Valid for broadcast until the next bulletin at 5:00 PM today.

HAZARDS AFFECTING COASTAL WATERS

A Gale Warning is in effect over the eastern seaboard of Visayas. Refer to Gale Warning No. 1 issued at 5:00 AM today.

24-Hour Sea Condition Outlook

Up to very rough seas over the following coastal waters:

- **Up to 5.0 m:** The seaboard of Surigao del Sur; the eastern seaboards of Siargao-Bucas Grande Islands.
- **Up to 4.5 m:** The eastern seaboards of Northern Samar, Eastern Samar, Dinagat Islands, and northern Davao Oriental.
- **Sea travel is risky for all types or tonnage of vessels. All mariners must remain in port or, if underway, seek shelter or safe harbor as soon as possible until winds and waves subside.**

Up to rough seas over the following coastal waters:

- **Up to 4.0 m:** The northern and eastern seaboards of Catanduanes; the eastern seaboards of Albay and Sorsogon; the northern seaboard of Northern Samar.
- **Up to 3.5 m:** The eastern seaboards of Isabela and northern Aurora; the northern seaboards of Camarines Norte and Camarines Sur; the northern and eastern seaboards of Polillo Islands; the remaining seaboard of Davao Oriental.
- **Up to 3.0 m:** The seaboards of Batanes, Babuyan Islands and Ilocos Norte; the remaining seaboards of Eastern Samar and Dinagat Islands; the eastern seaboard of southern Davao del Sur.
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced or operating ill-equipped vessels.**

Up to moderate seas over the following coastal waters:

- **Up to 2.5 m:** The seaboard of Palawan; the remaining seaboards of Aurora and Catanduanes; the seaboard of northern Quezon.
- **Up to 2.0 m**: The seaboards of Antique and Southern Leyte; the western seaboard of Zambales, Bataan, Occidental Mindoro, Romblon, and Aklan; the eastern seaboard of southern Oriental Mindoro; the southern seaboard of Iloilo, Guimaras, and Negros Occidental; the remaining seaboards of Quezon, Bicol Region, Eastern Visayas, and Caraga,
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

Other coastal waters have forecast wave heights of less than 2.0 m.

TRACK AND INTENSITY OUTLOOK

- **It must be emphasized that heavy rainfall and severe winds may still be experienced in localities outside the landfall point and the forecast confidence cone. Refer to "Other Hazards affecting Land Areas" for more details. Furthermore, the track may still shift within the limit of the forecast confidence cone.**
- BASYANG will move generally westward for the next 36 hours before turning west northwestward beginning tomorrow (05 February) evening. On the forecast track, the center of BASYANG will make its initial landfall over eastern Mindanao between tomorrow evening and Friday (06 February) morning. Afterwards, it will traverse the landmass of northeastern Mindanao and Central and Western Visayas and emerge over Sulu Sea by Saturday (07 February) morning. By Saturday afternoon or evening, BASYANG will cross the northern portion of Palawan, then re-emerge over the West Philippine Sea.
- BASYANG is forecast to gradually intensify while over the Philippine Sea and may reach tropical storm category today. After its initial landfall, it will weaken into tropical depression while traversing Visayas and will be downgraded to low pressure area by Sunday (08 February).

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 5:00 PM today.
